elettrica

Lightweight bespoke handmade ebike.

Designed and made in Italy.

Welcome to Bespoked Bristol - The UK Handmade Bicycle Show
A celebration of the handmade bicycle industry.

It's a very exciting time for frame building at the moment. The depth of talent and level of enthusiasm is quite astonishing. The craftsmanship on display here is amongst the best in the world.

The people who make these wonderful bicycles are the people you will meet and talk with at the show. They are the ones with the skills to tailor a bicycle to meet your requirements to make the bike of your dreams. We have asked some of these talented individuals to combine their skills to make a bicycle live at the show for one very lucky person. Watching a true master at work is a sight to behold and we hope that this event helps give insight into what makes the bicycles on display here such special machines.

We would like to thank everyone who has attended and all those exhibiting for making this year's show happen. Our thanks go to all who have contributed to the Live Frambuild.

Thank you to Lindsay Gray for all her help and support with the organisation of the show and of us! Paul Golding (www.goldsealphotography.co.uk) for photographing all the exhibitor's work. Thank you to Odoni for providing cycle parking and thank you to our sponsors for their support.

We hope that you enjoy the show!
Tessa and Phil Taylor
Organisers, Bespoked Bristol

14 BIKE CO

STAND 14

Maker - Lee cooper, Ted james & Lhw **Designer** - Ted james & Andy Ellis
Where - London, Coventry, Littlehampton **Number Made PA** - 100

Since we opened our doors in Spring 2009, we have built over 500 bikes for our very satisfied customers. All our frames are hand-built in the UK using British steel. At 14 Bike Co, we don't simply put you on a bike – we build a bike for you. We start by measuring for the right size frame. If we have the correct frame in stock, then we can move on to the next stage. If we don't, then we'll build one especially.

18 BIKES LTD

STAND 30

Maker - Matt Bowns **Designer** - Matt Bowns
Where - The Peak District - UK **Number Made PA** - 20

18Bikes have been producing custom frames in the Peak District since 2006. We design and make frames one at a time to ensure we create the best frame possible. We use the most appropriate materials and manufacturing techniques and can design and build any style of frame. We are best known for mountain bike hardtails using Reynolds 853, but the bikes we are bringing to this years show will demonstrate how versatile we are. Expect road bikes, lugs, stainless steel, fillet brazing and even aluminium.

STAND 03

BIKE SCIENCE

Maker - N/A **Designer** -
Where - Bristol, Derby, Rotherham **Number Made PA** -

Bike Science was established in March 2010 by Andy Sexton. Andy has over twenty five years of competitive biking experience and over twenty years as a triathlete. While working at Planet X he identified the need to be able to offer accurate, professional bike fitting services to riders wishing to buy bikes without being able to try the actual bike for size first and riders wishing to optimise their riding position to increase performance, avoid injury or improve comfort. He started Bike Science with these aims in mind.

BROMPTON

STAND 02

Maker - Brompton Bicycle Ltd **Designer** - Brompton Bicycle Ltd
Where - Brentford, London **Number Made PA** - 36,000

Brompton Bicycle designs and manufactures the famous Brompton folding bike, a bike that marries the performance of a full-sized, agile bicycle with the convenience of a truly portable and storable package. Finely-engineered and elegant, the Brompton has a full-sized frame, made mainly of steel for strength and stiffness. All of our bikes are made bespoke to order, with many millions of permutations available. And the bikes are no more unique than their manufacture – since Andrew Ritchie invented the Brompton in his flat overlooking the Brompton Oratory, every Brompton is still hand brazed and built in London.

BROOKS ENGLAND

STAND 63

Maker - Designer -
Where - Number Made PA -

Over almost a century and a half, Brooks England has grown from a small workshop to a byword in quality craftsmanship. Back in 1865, John Boulton Brooks left his hometown of Hinckley in Leicestershire with just £20 in his pocket. On 28 October 1882, Mr Brooks filed his first saddle patent. Inspired by the timeless products designed by our predecessors, we have revived the original slogan 'Saddles, Bags, Etc' and introduced a range of cycle bags and other cycling accessories.

COLUMBUS - GRUPPO SRL

STAND 23

Maker - Designer -
Where - Italy Number Made PA -

The story of the most famous steel tubes in the history of cycling began in 1919 when A.L. Colombo founded his steel plant with the ambition to "to do business in iron and steel and make a fair and honest profit". The result was the history of cycling as we know it: legendary tube sets AIR, MAX, SL, SLX, NIVACROM (EL and Genius), Altec, Starship and Spirit right up to 2009's XCR, the world's first ever tubeless stainless steel tube set which allows for the production of a steel frame competitive at the highest level of the sport on all levels: weight, rigidity, fatigue resistance and of course the remarkably superior handling of steel.

FLAT FRAME SYSTEMS

STAND 17

Maker - Flat Frame Systems Ltd Designer - Mike Cubbage
Where - High Wycombe, Bucks. Number Made PA - 12 - 24

Flat Frame Systems design and build cycle frames from 'Engineered Wood', which can be covered with high quality Veneer; for example: American Black Walnut or Ash, Cherry, Oak etc, all the way through to Zebrano. It is known that a Wood Frame bike is very comfortable to ride, being slightly flexible to allow for a smoother journey. The CNC cut frame is made from sustainable timber, and the laminations act like a natural carbon fibre. Each frame is: numbered, signed and dated with a certificate...to create a unique piece of furniture on wheels.

INDEPENDENT FABRICATION

STAND 61

Maker - Designer -
Where - New Hampshire Number Made PA -

Independent Fabrication has been a pioneer in the manufacturing of custom bicycles and bicycle frames since 1995. Today the IF team of artists and fabricators continue to push the envelope by using the newest metal technologies and refining accepted techniques. But even as production methods become more sophisticated with the use of carbon fiber and titanium shotpeening, the IF team continues to make bikes by hand and respects the craftsmanship of the old way. But they'll never stop doing things their own way. THAT'S INDEPENDENT FABRICATION

MAWIS BICYLES

Maker - Mathias Scherer Designer - Mathias Scherer
Where - Germany Number Made PA - 35

Bikes say a lot about yourself. Why then should a frame not be every bit as unique as the human being riding it? That's why I love and build custom frames. I don't do production runs. I build bespoke bikes, one by one, starting with design and the geometry to fit you like a glove, continuing with a hacksaw, a file, a TIG welder, a pipe bender and finishing everything off with an extensive manual finish and a bolt on headbadge. If I had a say everybody would ride a custom bike.

MERÉNYI BICYCLES

Maker - Daniel Merényi Designer - Daniel Merényi
Where - Miskolc, Hungary Number Made PA - 40

Merényi Bicycles is a small enterprise founded to build bicycles with a method fairly unknown in Hungary. It is our objective to respect and try to meet the needs and demands of the cyclists already in the process of frame building. In our choice of tubing and technology, we are not bound by piled-up stocks. In the choice of paintwork and ornamentation, there are no fixed designs enforced by executives, moreover, we know and use more colours than red, blue and yellow. Each and every one of our frames is unique, numbered and built for custom order. We believe that the birth of a bicycle is an adventure we share with our customer.

Maker - Dan Titchmarsh **Designer** - Dan Titchmarsh
Where - York **Number Made PA** - 15

Titchmarsh Cycles builds functionally and aesthetically exquisite bespoke cycle frames for the discerning cyclist. Each bicycle is tailored to suit the needs of the rider and fit perfectly for an enhanced experience. I've had a lifelong passion for my craft and coming from an aerospace and motorsport frame building background, I can build in steel, titanium and stainless and weld with TIG and gas. I'm based near York and offer a personalized, friendly service.

TOKYO FIXED

STAND 09

Maker - Designer -
Where - Number Made PA -

Tokyo Fixed started as a web only shop in Tokyo, 2006. We opened our shop front in the heart of London's Soho in November 2009. We choose products from all over the world. We choose clothing not only for cycling but for cycling people. We look for small quality brands who have a passion for both style and function. The same goes for the cycle and cycle accessories brands we stock. We also specialise in building custom bikes of any style and making people's bicycle ideas come to life.

STAND 09

TONIC FABRICATION

Maker - Landon and Tony **Designer** - Landon and Tony
Where - Number Made PA -

Everything from Tonic Fabrication is hand made in house by the two man team Landon & Tony. This allows them the flexibility to construct some of the toughest, smoothest and most rugged frames we've seen in years. Shying away from fancy features and pointless brazing, the technical side of Tonic bikes really shines through; their attention to frame design, their signature head tube stack, the use of BB30 in their cross models and the wishbone stays are subtle nods for those in the know. When all these features come together you get something unique, understated and very special.

BOOCYCLES

Maker - Henry James Designer - Henry James
Where - Number Made PA -

Having a passion for using natural materials, working as a bicycle mechanic and a love of cycling, has led me to making Boocycles. Bamboo bikes are becoming increasingly popular. The others that I have seen are only frames partially consisting of bamboo. Therefore each time I begin making I set out to make more of the bike from bamboo than previously. In addition I am not just making the bikes for show, but comparable to other, far more tried and tested materials, in an effort to make the most environmentally friendly mode of transport.

BTR FABRICATIONS

Maker - Tam Hamilton & Paul Burford Designer - Tam Hamilton & Paul Burford
Where - In the shed, East Preston, West Sussex Number Made PA - 10 - 20

Burf and Tam Racing (that's BTR) is the creation of bike geeks Burf - who loves making stuff, and Tam - who loves designing stuff. Together they make a formidable pair in the world of innovative bike design and building. It's become our mission to create good honest bicycle frames for people that couldn't care less about the hype, but who just love to ride their bike fast, because that's what we like to do. We are also currently working on a few new ideas that will change the way you think about your bike, so keep 'em peeled!

DMO FRAMEWORKS

Maker - Olly Webb Designer - Olly Webb
Where - Chippenham Wiltshire Number Made PA -

A genuine, grass-roots family affair! DMO stands for 'Dennis Michael Oliver', Dennis is Oliver's Granddad (a retired fabricator and sheet metal worker from Jaguar), Michael is Oliver's Dad (a retired engineer from BMW) and Oliver is, well, the guy who sticks all the bits together! The frames are manufactured in Olly's workshop in Chippenham Wiltshire (his own words) "I say workshop - it's a brick built 8'x6' shed I like to call a workshop". Olly's target is to make 10 frames a year, initially focusing on completely bespoke (no lugs or pre-bent, off the shelf tubing) 29'er mountain bike frames aimed at mountain bikers interested in extending those single day rides into Bike Packing adventures! For the uninitiated, Bike Packing entails strapping all your kit onto a bike for one, two or more nights out in the wilderness!

OYSTER BIKES**STAND A**

Maker - Stuart Risby **Designer** - Stuart Risby
Where - Southampton **Number Made PA** -

Oyster Bikes designs and builds bespoke suspension and hardtail mountain bikes. The suspension bikes feature a simple single pivot frame with a distinctive drive design. All frames are constructed in steel and T.I.G. welded. Bikes are either single speed or gearbox driven, resulting in simplicity and low maintenance. Each bike is developed with the client to ensure that their Oyster is tailored to their needs, from frame geometry and tube selection to fittings and colour.

Sword Cycles - bringing your dream bike to life

It's All About the Bike: the Pursuit of Happiness on Two Wheels by Robert Penn is published by Penguin. A Sunday Times bestseller in the UK, it's been translated into nine languages.

'A book as brilliant as the invention it celebrates. A wonderful read.' *Nick Crane*

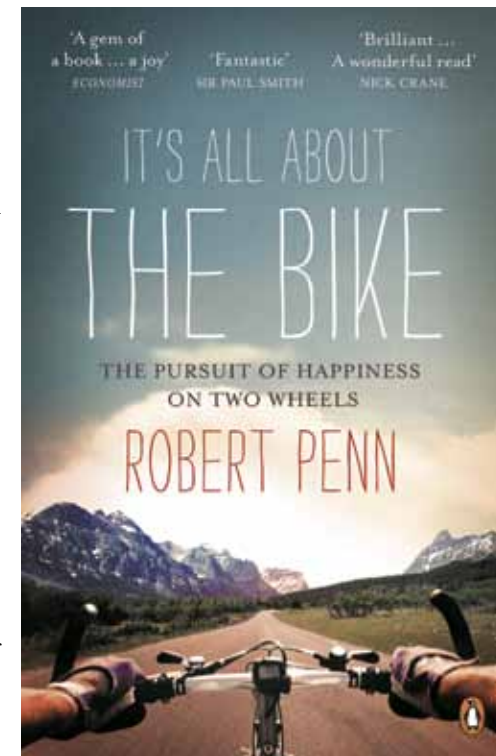

'Gem of a book.' *The Economist*

'Artfully, Penn turns his quest for new hardware... into a worldwide spin around cycling and its culture.' *William Fotheringham, Guardian Review*

'It is difficult not to be swept along by Penn's enthusiasm... He writes with authority, humour and refreshing candour.' *Charles Starmer-Smith, Sunday Telegraph.*

'A rare and precious portal to the heart and soul of bike culture,' *Atlantic*

'A joyful book,' *The Scotsman*

TEAGUE BICYCLES

STAND G

Maker - Matt Teague Designer - Matt Teague
Where - London Number Made PA - 6

Matt Teague started building bicycles in 2011 in east London, mostly for friends and family and mostly because he was unable to find exactly what he wanted for everyday use in and around London. He believes that bicycles are the ultimate personal transport solution for medium and short distances (and long ones too – time permitting) and seeks to build machines that will soak up the rigours of daily life on the road. Frames are built in a variety of techniques, but lugged steel predominates because it is strong, lightweight and timeless.
